RESPONSE

SIR:

This paper addresses the final Office Action mailed on May 5, 2006. For at least the reasons stated below, Applicants submit that the pending claims 1-8 are patentable in view of the prior of record.

I. Objection to Claims 1, 6 and 8

Claims 1, 6 and 8 are objected to as reciting the vague limitation of "fully activating the motor." Applicants respectfully submit the term is not vague in the present application. Additionally, this term has proper support in the specification, as originally filed, thereby making this term clear and the objection improper.
